

Amendments to the Drawings:

FIGs. 6-8, 14 and 15 have been amended to include reference number 100, which properly identifies the gusset used to attach the top and bottom surfaces 101, 102 of the cushion 33.

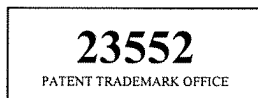

Attachment: Replacement Sheets

REMARKS

Claims 1-20 were rejected under 35 U.S.C. §112, second paragraph, as being indefinite. The specification in the paragraph beginning at page 7, line 22 and FIGs. 6-8, 14 and 15 have been amended to identify the gusset with reference number 100. The gusset 100 is described as a member that attaches the bottom surface 101 to the top surface 102 of the cushion 33. The gusset 100 includes a starboard portion 135 and a port side portion 142 which extend along the starboard and port sides of the floor cushion 33. The gusset 100 is shown extending around a periphery of the cushion 33. The bottom surface 101, top surface 102, and gusset 100 define an inflatable bladder 34. A plurality of I-beam baffles 136-141 are positioned within the bladder 34.

In view of the above, Applicants submit that the claims of the application are definite. Withdrawal of the rejection is respectfully requested.

If a phone conference would be helpful in resolving any further issues related to this matter, please contact Applicants' attorney listed below at 612-371-5387.

Date: August 11, 2006

Respectfully submitted,
